

New York's 2022 General Election & The Reign of Error | SUMMARY SHEET, SECOND EDITION

APATHY, INCOMPETENCE, OR MALFEASANCE?

► THERE ARE TWO KINDS OF ELECTIONS IN AMERICA:

- ACCURATE
- INVALID

► WHAT MAKES AN ELECTION VALID?

The Legal Standard for a certifiable election is based on Four Tenets of Law:

- Voter rolls must be accurate,
- Votes counted must be from eligible voters,
- The number of votes counted must equal the number of voters who voted,
- The maximum allowable system error rate in a valid election is 1/125,000 ballots in error.

1. Are the voter rolls accurate, as required by the National Voter Registration Act of 1993 (accurate is defined as “free from error” in Webster’s dictionary) (P.1)?

- **5,142,950** apparent registration violations in NYSvoter, including:
 - o **1,545,711** purged registrations with no purge date (P.2)
 - o **1,467,399** illegal duplicate registrations (P.2)
 - o **712,000** purged records that were never active (P.2)

2. Are votes counted from eligible voters, as required by the Constitution?

- A total of **745,294** of the apparent voting violations in the 2022 GE have a vote cast (P.7)
- **449,856** illegal duplicate registrations voted, and **2,440** cast double or more votes (P.7)
- **254,090** votes cast by people registered on January 1st, an invalid registration date (P.7)
- **16,623** blank address registrants voted (P.7)

3. Does the number of votes counted equal the number of voters who voted?

- **5,965,684** votes counted (NYSBOE official reported results of 2022 GE report)
 - **5,930,372** voters who voted (NYSVoter raw data, official federal document)
- 35,312** more votes counted than voters who voted (P.10)

4. Was the 2022 (and 2020) Election Valid?

The maximum allowable system error rate in a valid, certifiable election is stringent—1/125,000 ballots in error according to the Help America Vote Act. (P.11)

2022 allowable system errors	48	2020 allowable system errors	70
2022 apparent voting errors	745,246	2020 apparent voting errors	960,476

APATHY, INCOMPETENCE, OR MALFEASANCE?

► FRAUD ALERT

Many of the issues presented in this report are listed in the guidance posted by the Department of Defense Inspector General's "Comprehensive List of Fraud Indicators" and the NY State Comptroller's Office "Red Flags for Fraud." (P12)

► CONCLUSION

The 2022 (and 2020) General Elections in New York were not provably valid at the time of certification, as required by law. All the data audited by NYCA are official records provided by the New York State and county boards of elections. Yet they have dismissed or excused these findings, while launching campaigns that are not factually honest to intimidate both researchers and citizens. Probable cause for an investigation has been demonstrated.
